AN AUSSIE PHYSICIST IN QUEEN ELIZABETH'S COURT

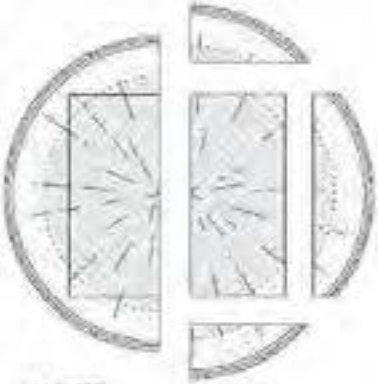
DR ROBYN PENDER

BUILDING CONSERVATION + RESEARCH TEAM
CONSERVATION DEPARTMENT

METHODS OF CONVERTING A LOG INTO BUILDING TIMBERS

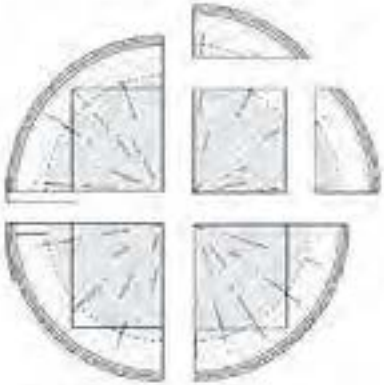
BOXED-HEART

used for posts, beams, purlins, plates, ridges, rafters



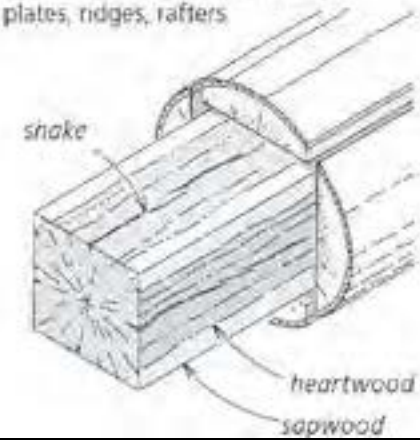
HALVED

used for girdings, bressumers, roof truss components, studs, braces, joists, rafters



QUARTERED

used for plates, joists, ridges, rafters



As a boxed-heart timber dries, shakes that follow the planes of the medullary rays tend to develop towards the centre of each face of the timber

THE LIME CYCLE !

START WITH LIMESTONE

$CaCO_3$

CALCIUM CARBONATE

GRIND IT UP AND CALCINE (BURN) IT

$CaCO_3$

+ 900°C

YOU GET QUICKLIME

$$CaCO_3$$

+ 900°C

$$= CaO$$

CALCIUM OXIDE

‘SLAKE’ IT WITH WATER

$$CaCO_3 \xrightarrow{+\ 900^{\circ}C} CaO \xrightarrow{+\ 3H_2O}$$

YOU GET SLAKED LIME

$$CaCO_3$$

$$+ 900^{\circ}C$$

$$CaO$$

$$+ 3H_2O$$

$$= Ca(OH)_2$$

CALCIUM HYDROXIDE

MIX WITH SAND, HAIR etc

$CaCO_3$

+ 900°C

CaO

+ $3H_2O$

$Ca(OH)_2$

PLACE AND EXPOSE TO AIR

$CaCO_3$

+ 900°C

CaO

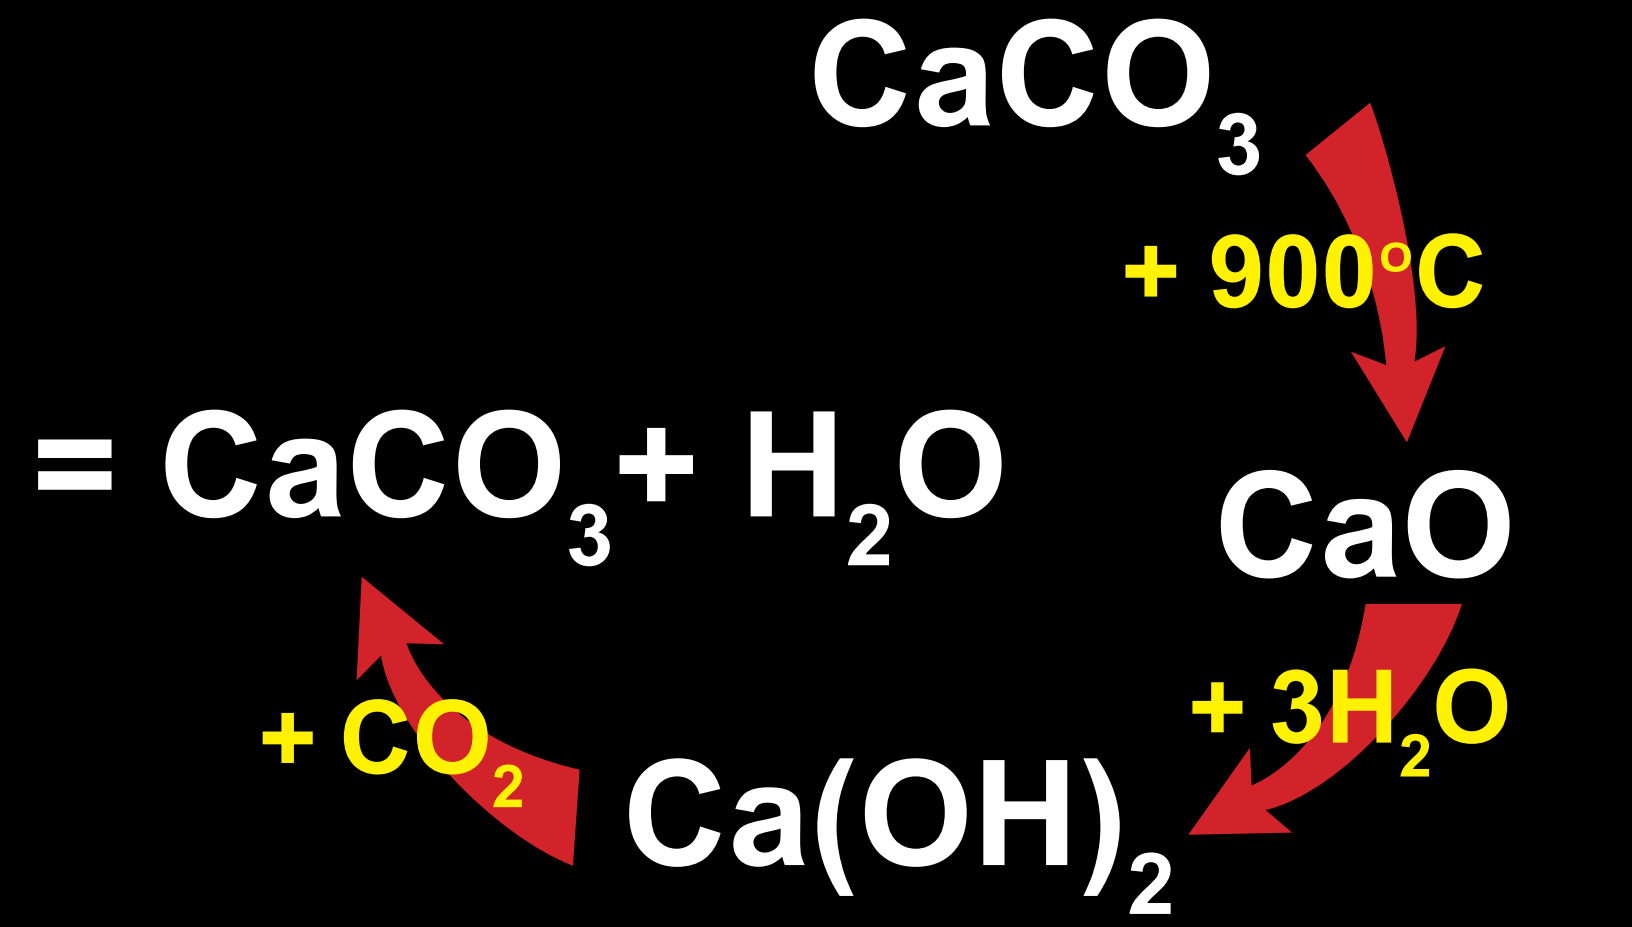
+ $3H_2O$

$Ca(OH)_2$

+ CO_2

CARBON DIOXIDE

IT CARBONATES...



...GOING BACK TO LIMESTONE !

$CaCO_3$

+ 900°C

CaO

+ $3H_2O$

$Ca(OH)_2$

+ CO_2

- H_2O

BUT...

HOW LONG IS A PIECE OF STRING?

2 377 978 metres

686 metres

ANSWER:

1 m

ANSWER:

$$1 \pm 10^4 \text{ m}$$

YOU NEED TO SEE THE ERROR TO UNDERSTAND THE NUMBER

RESEARCH INTO THE THERMAL PERFORMANCE OF TRADITIONAL BRICK WALLS

ENGLISH HERITAGE
RESEARCH REPORT

TABLE 3: COMPARISON OF CALCULATED U-VALUES

WALL DESCRIPTION	RANGE OF MEASURED VALUES Average, Y and standard deviation	CALCULATED U-VALUES Assumed brick thermal conductivities			
		1.2 W/mK	0.77 W/mK	0.56 W/mK	0.44 W/mK
ENGLEFIELD 13-inch brick with plaster + wallpaper or paint	1.2 to 1.6	2.2	1.7	1.5	1.3
ENGLEFIELD 13-inch brick drylined with plasterboard + paint or wallpaper	1.0 to 1.1	1.5	1.2	1.1	1.0
ENGLEFIELD 13-inch bare painted brick	1.1 to 1.4	2.4	1.8	1.5	1.3
ENGLEFIELD 13-inch brick with cement render	0.9 to 1.3 [1]	2.2	1.7	1.3	1.3
SHREWSBURY 9-inch brick with plaster + wallpaper or paint	1.0 to 1.5	2.6	2.0	1.8	1.6
WALSALL 9-inch brick with plaster + paint or wallpaper	1.9 to 2.3	3.6	3.0	1.8	1.6
WALSALL 9-inch brick drylined with insulated plasterboard + paint or wallpaper	0.6 to 0.7	0.7	0.7	0.6	0.6

NOTES:
1. One measured result only: the range is expressed as the value ± the measurement uncertainty

The calculated values are also compared with the measured results in *Figure 4*. The calculated values assume that the plastered walls use lime, and the insulation in the Walsall drylined walls is phenolic insulation.

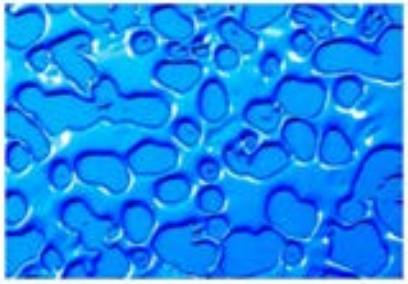
Hundred-year-old law on fluid flow overturned by Imperial research

by Colin Smith
17 July 2017



4 comments

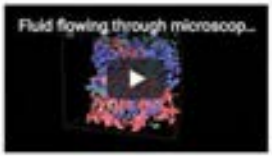
Print this story

Engineers from Imperial College London have dispelled a 100-year-old scientific law used to describe how fluid flows through rocks.

The three 3D models below show fluid flowing through rocks at different microscopic scales.



The discovery by researchers from Imperial could lead to a range of improvements including advances in Carbon Capture and Storage (CCS). This is where industrial emissions will be captured by CCS technology, before reaching the atmosphere, and safely stored in rock deep underground.
